GREEN PRODUCTS AND SERVICES COMPANIES IN MALAYSIA

All of us desire the world to be a better and more enjoyable place to live in. However, the enormous strain on the earth's resources and environment that come in tandem with the increasing demands of its population more than justify a concerted effort by enterprises to take the lead in providing environmentally-friendly products and solutions that will help to limit environment degradation across the globe. In this issue, **Top 10 of Malaysia** takes a brief look at its pick of the nation's top 10 green products and services companies.

SP Multitech Sdn Bhd

SP Multitech began operations in 1996 with the aim of providing a wide range of environmental engineering services relating to sewage, waste and leachate treatment plants. Its focus and emphasis is on the services that make for a friendly environment and consequently, providing solutions to environmental problems. The company also provides a wide range of maintenance services in the mechanical and electrical engineering, security systems and property development sectors. SP Multitech is active in providing services for water and waste water treatment plants and pumping stations, heavy and light industrial factories, high rise complexes and government buildings, commercial and residential developments as well as for oil and gas petrochemical plants and special turnkey projects. The company's philosophy is to provide professional services in the advancement of eco-friendly living.
