

Proximity access control components by deister electronic have gained worldwide recognition for the superior performance and wide choice of compatible products.

Innovative design has made the products exceptionally compact providing the highest level of security and reliability, even in hostile environments.

CCL / CKL - Chameleon Snap-On Cover

Chameleon is the new reader concept designed by deister electronic. With changeable technology and design it can fulfil market orientated requirements according customers needs.

The snap on cover can be fixed easily on the reader. It fully hides the wall mounting box as well as the reader installation screws.

In addition the chameleon concept provides the possibility to integrate various reading technologies and special outfits like own company logo and customized colour.

CCL / CKL can be combined with tamper contact and spacer.

- **Compatible with PRX5, PRM5, PRL5 and PRA5**
- **Fits on Tamper plate TSL**
- **CCL for use with compact reader**
- **CKL with opening for use with keypad reader**
- **Own color possible**
- **Own company logo possible**
- **All reading technologies possible**
